

Italian sensor specialist CFC to represent Austrian EVK industrial imaging solutions on the Italian market

Graz 26th of September 2019 - EVK DI Kerschhaggl GmbH, the Austrian expert in industrial imaging for sorting and monitoring bulk materials in the food, recycling and mining industries, appointed CFC Electronic S.r.l. as its partner to offer industrial imaging solutions to the Italian market.

CFC Electronic, based in Granarolo dell' Emilia (Bologna), was founded with the aim of being the Italian market leader in the field of sensors. CFC's philosophy is to incorporate in its portfolio companies with high technical content, innovative power and leadership in their respective sector of operations.

EVK perfectly matches the CFC philosophy. The two companies will enjoy a mutually beneficial relationship. EVK benefits from working with a company with experience in sensors and knowledge of the Italian market. CFC has at its disposal a leader in hyperspectral imaging with strong data analytics skills. With this partnership, CFC can now offer its customers state-of-the-art industrial imaging solutions for the inspection, monitoring and sorting of bulk materials across a variety of industries.

Matjaz Novak, CEO at EVK, explains: 'By collaborating with CFC, we can better serve our existing customers in this area. It brings our hyperspectral imaging technology closer to potential users who have previously hesitated to introduce such a technology in their sorting, monitoring or inspection systems. Our customers will benefit from EVK's integrated ecosystem consisting of sensors embedded in our data analytics platform.' He adds: 'Our platform will allow customers to customise the applications to their specific needs in next to no time.'

Gabriele Marchesini, CEO of CFC Electronic, points out: 'The new EVK product line perfectly reflects our strategy to expand our range in the field of smart sensors and to add data processing features to our products. EVK is one of the pioneers in hyperspectral imaging and we are delighted to collaborate with them in this endeavour.' Under this agreement, the EVK professional service team will offer CFC Electronic customers technical support during system acquisition, system integration and application development.

EVK DI Kerschhaggl GmbH

EVK is an expert in industrial imaging and data processing and provides sensor-based solutions for sorting and analysing bulk material in sectors including recycling, mining, food processing, and pharmaceuticals. The company specialises in the classification and analysis of data using hyperspectral and inductive sensor technologies. EVK is a one stop-shop offering solutions from data acquisition to data processing and decision making for the industry.

CFC Electronic S.r.l.

CFC specialises in a wide range of pressure, humidity, force, gas, etc. sensors that meet the most varied demands of our customers in different areas of application. Our philosophy is to offer a sophisticated, engineered product and a consulting service, to

identify the best solution for each type of project. Our goal is to become a market leader offering advanced solutions for customers in need of sensors.
