

People at **EVK** 

We connect sensors and provide key data for value-driven business decisions in industrial sorting and monitoring.

Visionary Mindset

Curiosity, creativity and the courage to try new things are what drives us.

Continuous Development

We are constantly improving our skills and expanding our knowledge.

Trustworthy & Reputable

We are reliable and reputable partners for our customers, suppliers and colleagues.

Sense of Ownership

We take responsibility for achieving our common goals.

Responsibility & Integrity

Our products and services add value to society.

Value-adding Products

We develop unique products with added value for our customers.

Success-driven Partnerships

We strive for long-term, mutually successful business relationships with our customers.

EVK is a global leader in industrial imaging and data processing, providing sensor-based solutions for sorting and inspecting in the recycling, food, mining and pharmaceutical industries.

We specialize in analyzing and classifying data using **hyperspectral and inductive sensor technologies** and **support our customers with all-in-one solutions** ranging from **data acquisition to data processing and decision making**.

Since its foundation in **1987** by Peter Kerschhaggl, EVK has become a renowned international company with around 30 employees at its headquarters in Raaba near Graz and another subsidiary in Korea.

Matthias
Kerschhaggl

CTIO / Owner

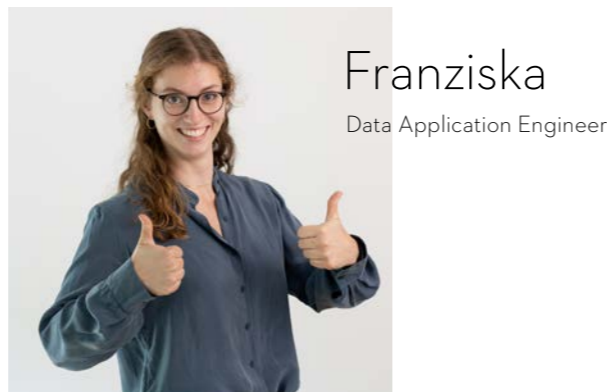

EVK combines sensor technology and data analytics to create application-specific solutions, providing valuable real-time data on manufacturing processes. The information we obtain from huge amounts of data enables our customers to develop brand-new solutions, processes and products. It is particularly important for us to promote our team's innovative strength, the core essence of our business, and to continuously develop our expertise. This makes sure that our customers have a long-term partner in us with whom they can tackle the challenges of tomorrow.

For decades, EVK and I have been sharing a success story that my father, as the founder and owner, heavily influenced. To be a leading provider in our field, we need both an innovative corporate spirit and motivated and committed employees who pursue our goals independently. Employees who support our customers using our smart solutions to utilize their resources efficiently for a sustainable future.

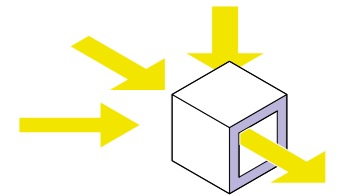

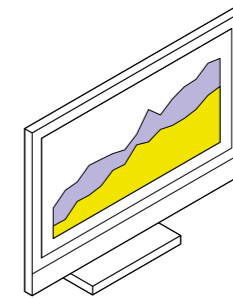

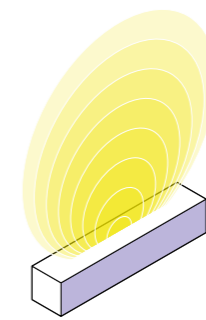

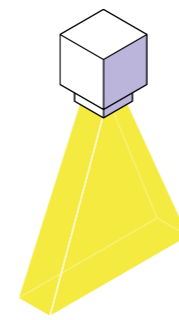

**“Life is like riding a bike.
To keep your balance,
you must keep moving.”**

True to this quote by Albert Einstein, EVK cultivates the pioneering spirit. I get to express my passion and creativity here, because it's not mistakes that are bad, it's inaction.

It's fascinating what this technology can do. I am particularly interested in testing new application areas for our customers' products. Combining the technical aspect and the direct contact with our partners makes my work exciting and varied.

EVK Hyperspectral Cameras

EVK Inductive Sensors

EVK Data Analysis

EVK Real-Time Image Processing

Driven by the spirit of innovation, our products and services are used in applications that **conserve and optimize resources and ensure product safety.**

Unique sensor systems **analyze and classify objects in the material flow in real time.** Our **EVK HELIOS hyperspectral camera systems** evaluate objects based on their chemical properties.

The **areas of application** range from determining fruit ripeness, separating bulk materials, detecting and removing foreign bodies, measuring the calorific value of SRF and RDF to identifying valuable minerals in rocks.

Our product experts continue to develop our products and have **extensive know-how ranging from hardware development and embedded software to complex analyses** using state-of-the-art technologies.

“아시아 지역의 총괄 책임자로서 상호 성장하는 비즈니스 관계가 특히 중요합니다. 성공은 공동 목표에 대한 장기적인 협력에서 비롯됩니다.”

이영수 (아시아 지역 총괄)

As Regional Manager for Asia-Pacific, business partnerships based on mutual respect and collaboration are particularly important to me. Success is achieved through long-term collaboration towards common goals.

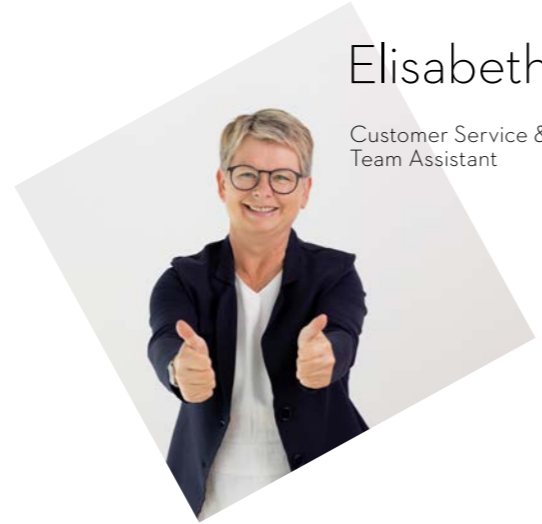

Youngsoo

Regional Manager for Asia-Pacific

Marko

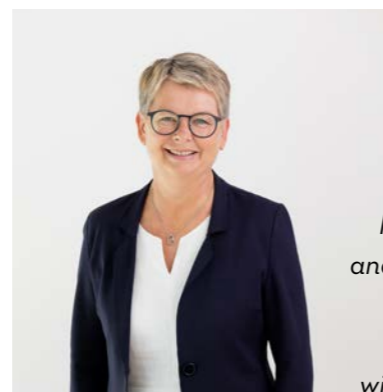

Production

I particularly like the freedom that working at EVK offers me. Flexitime means that I can organize my working hours freely, which I really appreciate as I have a small child at home.

Elisabeth

Customer Service & Team Assistant

My colleagues and I accomplish every task as a team. I work with some great people and we can count on each other. There's never a dull moment!

Our committed and motivated employees are the key to our success.

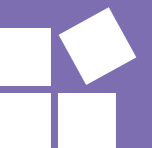

Curiosity, creativity and the courage to try new things guide us and help us to successfully break new ground. Working at EVK means taking responsibility, finding new solutions and boldly leading the way.

As an innovative company, the personal and professional development of each individual is particularly important to us. Together, we want to develop new products that contribute to a sustainable use and conservation of our raw materials and support safety in production.

What we offer:

- Option to work at home
- Flexitime without core working hours
- Continuous education and training opportunities
- Pension contribution
- Various bonuses
- Employee events
- Annual travel pass - travel allowance
- Good transport connections (bus, train)
- Car park on the company premises
- Grocery shops and restaurants nearby
- Meal allowance
- Free coffee & fruit
